PROFESSIONAL PROFILE

Software and Game Development (PPLG) student specializing in Full-Stack Development and Data Analytics. Strong background in web application development (React, Laravel) coupled with analytical foundations using Python and Exploratory Data Analysis (EDA). Experienced in building interactive systems, with a growing interest in AI technologies. Achieved 1st Place at the 2026 West Java Provincial LKS in Artificial Intelligence, and currently seeking internship, OJT, or freelance opportunities to contribute to real world software and data driven solutions.

KEY ACHIEVEMENTS

- **1st Place Winner – Provincial LKS Artificial Intelligence, West Java (Jun 2026):**
Performed exploratory data analysis for a student certification prediction project, identifying class imbalance, outliers, distributions, and feature correlations with Python, Pandas, and Seaborn as part of the 1st Place West Java Provincial LKS team.

CORE SKILLS & ATS KEYWORDS

- **Data Science & AI:** Python, NumPy, Pandas, Matplotlib, Seaborn, YOLO, Exploratory Data Analysis (EDA), Data Preprocessing, Data Visualization.
- **Fullstack Web Development:** React JS, JavaScript, Tailwind CSS, Flowbite UI, Vite, Laravel, PHP, Express.JS, Node.JS.
- **Database & Tools:** MySQL, PostgreSQL, Github, Google Colab, Figma, Draw.io, Notion.

PROFESSIONAL EXPERIENCE

Pussiberad TNI AD (Pusat Siber TNI Angkatan Darat) – Jakarta, Indonesia

Fullstack Web Developer Intern | July 2026 – Present

- Developed and architected a full-stack Military Company Profile and Internal Operations Dashboard web application for Satlak Dukteksi Pussiberad TNI AD using React.js, Tailwind CSS, Node.js (Express.js), and MySQL / Sequelize ORM.
- Built scalable RESTful APIs with Role-Based Access Control (RBAC) separating Admin and Soldier/Prajurit portals, featuring JWT authentication secured via httpOnly cookies and password hashing with bcrypt.
- Designed and optimized relational database schemas and migrations, including a many-to-many task assignment system for work programs (Program Kerja Tim).
- Implemented secure file-handling mechanisms for operational documents (PDF/DOCX) using private upload directories and strict authorization validation before file downloads.
- Engineered responsive, dynamic user interfaces for 9+ public pages (profiles, research products, galleries, interactive FAQs, inbox inquiries) and real-time administrative management modules.

SELECTED PROJECT EXPERIENCE

- **Satlak Dukteksi Pussiberad – Web Profile & Military Operations Dashboard System:** Build a full-stack institutional web portal and administrative management system using React.js, Node.js (Express.js), Tailwind CSS, and MySQL/Sequelize; built secure RBAC for Admin and Soldier portals, JWT authentication via httpOnly cookies, operational task management (Program Kerja), attendance & duty scheduling (Absensi & Jadwal Piket), and isolated private document management.

- **Student Competency Certification Predictor – LKS AI West Java 2026:** Spearheaded the Exploratory Data Analysis (EDA) pipeline using Python (Pandas, Seaborn, Matplotlib) for a predictive machine learning system; identified data anomalies (missing values, 2 duplicate records, and extreme outliers in Study_Hours via IQR boxplots), evaluated class distribution (2.03 mild imbalance ratio), and conducted Pearson correlation analysis discovering academic metrics (Assignment_Score 0.82, Theory_Score 0.81, Practical_Score 0.80) as key drivers of certification while filtering out non-correlated noise features (Locker_Number, Favorite_Color).
- **Trashure – Full-Stack Waste Management Platform | Laravel, Tailwind CSS, MySQL:** Developed a waste reporting platform featuring a gamified points system to incentivize user participation. Designed a regional reporting architecture mapping waste reports to specific administrative areas for accurate data tracking.
- **TixID Clone – Full-Stack Cinema Ticketing System | React, Laravel:** Built a comprehensive cinema ticketing platform enabling real-time seat selection with dedicated role-based dashboards for admins, cashiers, and customers. Implemented QR code-based payment confirmations, automated PDF ticket generation, and sales report exports to Excel.
- **Platzi Fake Store – E-Commerce Frontend | React, Vite, Flowbite:** Developed an interactive e-commerce frontend consuming a public REST API. Featured product filtering, pagination, and a shopping cart utilizing Flowbite UI components.
- **Studio Ghibli App – Movie & Character Catalog | React, Vite, Framer Motion:** Built an interactive catalog application to explore and filter movie and character data. Consumed external REST APIs integrated with global state management and implemented fluid UI animations.

CERTIFICATIONS

- Machine Learning with Python for Beginner – DQLab (2026)
- Belajar Machine Learning untuk Pemula – Dicoding (2026)
- Belajar Dasar AI – Dicoding (2025)
- Belajar Visualisasi Data & Dasar SQL – Dicoding (2025)
- Belajar Dasar JavaScript & Dasar Git – Dicoding (2025)
- Belajar Dasar Pemrograman Web – Dicoding (2024)
- IGDx Career Kominfo & OSH/K3 ILO (2024)

EDUCATION

- Software and Game Development, SMK Wikrama Kota Bogor Expected graduation: January 2027
Relevant focus: Full-stack web development, data analytics, and artificial intelligence
